# THE i-SENSYS X RANGE

## COMPACT, FEATURE-PACKED LASER PRINTERS

The workplace is evolving rapidly, and so are your organisation's document and workflow needs. Empower your staff to work and collaborate securely and productively, from wherever they are, keeping fleet cost firmly under control.

The i-SENSYS X range has been designed as an essential component to the diverse information management demands of modern businesses. Covering black and white, colour, single and multifunctional devices in compact designs, the range adds essential flexibility to business print ecosystems, to suit the budget, space and functionality demands of any working environment.

i-SENSYS X delivers high-performance print and scan capabilities at lower running costs thanks to new exclusive toner cartridges, without compromising on productivity and security. Thanks to a focus on connected solutions and print management systems such as uniFLOW, these devices easily integrate with your existing fleet, providing better consistency and experience across the entire print and capture portfolio.

A portfolio of fast, efficient and compact desktop devices adding print and scan capabilities to your fleet.

# INTEGRATE **SEAMLESSLY** FOR THE FUTURE OF WORK

As businesses adopt a more hybrid approach to working, they need solutions that give flexibility and cost advantages without compromising on security. The i-SENSYS X range meets these evolving needs for hybrid working perfectly.

Now your teams could be working from anywhere, and frequently moving between home-working spaces, satellite offices and your central headquarters.

The i-SENSYS X range fits seamlessly into your existing print ecosystem, with mobile and cloud connectivity, including integration with Canon's uniFLOW cloud-based services and large multifunction devices – such as our imageRUNNER and imageRUNNER ADVANCE portfolios.

This means users can connect to devices on the go and switch seamlessly between i-SENSYS X and imageRUNNER printers with a consistent user experience, wherever they are located. Help your teams stay productive even as they move between working environments. Meanwhile, each device can be accessed, controlled and managed centrally as part of a coherent ecosystem, with the same security protection as the office.

# EXTEND YOUR PRINT ECOSYSTEM

Perform print jobs easily through an intuitive, customisable 5" touch screen LCD display, with frequent tasks accessible directly from the home screen

While higher production A3 printers may suit your headquarters, small teams and home and satellite offices need devices that save on budget and floorspace. The i-SENSYS X series offers cost-effective, high-accuracy, A4 print and capture capabilities in a compact design, making them perfect for remote workspaces. This helps you extend the capabilities of your fleet to support new, complex hybrid working environments.

# PRINT AND SCAN FROM ANYWHERE

i-SENSYS X devices offer cloud connectivity and integration with our uniFLOW Online software, so your staff can access the print, capture and collaboration tools they need, from anywhere. uniFLOW Online also ensures that our devices are simple to manage and simple to use. The cloud-based software enables your IT team to centrally manage your entire fleet, even across multiple locations. Meanwhile, with a single, unified user experience across multiple machines, the software ensures our devices are always consistently easy to use, wherever you access them from.

Access the latest secure capture and print technology across Canon's hardware, software and services, including user authentication, secure printing, data encryption, and network and device integrity protection.

# SUPPORT **SECURE** **HYBRID** WORKING

Managing devices in a distributed fleet, across a mixed print and digital environment, raises new security challenges. The i-SENSYS X range includes built-in user authentication, data encryption, secure bootup and printing, network and device integrity protection. This helps you keep data and documents safe and secure, whether printing and scanning in the “main” office, a small satellite office or at home.

## PRODUCT SUMMARY

### A4 Mono Printer

i-SENSYS X  
1238P

38 PPM	900 Max PC
750-4,000 RMPV	
Toner T08	

i-SENSYS X  
1238Pr

38 PPM	900 Max PC
750-4,000 RMPV	
Toner T08	

i-SENSYS X  
1643P

43 PPM	2,300 Max PC
2,000-7,500 RMPV	
Toner T06	

### A4 Mono Multifunctional Printer

i-SENSYS X  
1238iF

38 PPM	900 Max PC
750-4,000 RMPV	
Toner T08	

i-SENSYS X  
1238i

38 PPM	900 Max PC
750-4,000 RMPV	
Toner T08	

### A4 Colour Multifunctional Printer

i-SENSYS X  
C1127i

27 PPM	850 Max PC
750-4,000 RMPV	
Toner T09	

i-SENSYS X  
C1127iF

27 PPM	850 Max PC
750-4,000 RMPV	
Toner T09	

### A4 Colour Printer

i-SENSYS X  
C1127P

27 PPM	850 Max PC
750-4,000 RMPV	
Toner T09

# i-SENSYS X GENUINE **TONER**

i-SENSYS X genuine toner is designed specifically for i-SENSYS X printers to provide you with the fast fusing performance and high-quality print you expect at a lower price. Canon toner technology ensures uncompromised results.

For beautiful, long lasting print quality, trust Canon-engineered i-SENSYS X genuine toner.

The phrase “for use in Canon products” does not mean it’s an original Canon cartridge. When buying a Canon cartridge always look out for the hologram, with its colour change technology, and the ‘Genuine’ Canon logo on the outside of the package. Then you can be certain that you’ll get the very best print quality from your Canon printer, fax machine or multifunctional device.

High quality

Fast & long Life

Easy handling
